WHAT I DO

Everything a med spa needs *online*

01

Websites

Fast, mobile-first med spa websites with online booking, treatment pages, prices and reviews. Live in 2–3 weeks.

02

Funnels

Offer and quiz funnels for ads and Instagram, each built to get one thing: a booked appointment.

03

Social media

12 posts, 4 Reels and Stories a month, written for your spa with hooks that get people to stop scrolling.

04

Meta ads

Facebook and Instagram ad graphics and copy, tested with several hooks and sent to a funnel that books.

05

AI automation

An AI receptionist that texts back missed calls, answers questions and books, plus Instagram DM automations.

06

Systems

GoHighLevel booking, reminders, review requests and rebooking follow-ups, so no lead is forgotten.

In this portfolio

Five websites, two funnels, Instagram feeds for 13 brands, Meta ad graphics and AI automation flows. The websites and funnels all work: Click any link to try them: book a test appointment, take a quiz, build a laser package or fill a shopping bag.

These are concept projects for fictional spas, built to show what I can make for you. Names, reviews and numbers are made up; photos are free stock photos and get replaced with yours.
